-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3, 4 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Shintani et al. (6,137,546).

Regarding claim 1, Shintani discloses a television receiver showing a digital television receiver (14,16,18,20,22), a conventional analog television receiver (23,40,44), a channel tuning map memory (33), and a microprocessor (51). The combination of the above elements meets the first and second channel searching means as claimed. Shintani further shows a means for judging (step 66), a means for starting (steps 68,70,72), and a step for terminating (steps 66 and 74).

Regarding claim 3, Shintani shows a digital tuner 14, a digital demodulator 18, and a receivable digital channel is determined by step 98.

Regarding claims 4 and 6, see above corresponding rejections.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shintani et al. (6,137,546).

Regarding claim 2, Shintani shows the ascending order of channels for first channel searching means and second channel searching means (note steps 74 and steps 92), but does not specify the descending order of the second channel searching means as claimed. In any event, the examiner takes Official Notice that the searching channels in a television receiver in either ascending or descending order are well known in the art. It is a matter of user preference and it would have been obvious to one of ordinary skill in the art at the time of the invention was made. For instance, the digital tuner in Shintani can be modify to search channels in descending order by simply changing step 88 from lowest channel number to highest channel number, and changing step 92 to CH-1.

Regarding claim 5, see rejection to claim 2.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

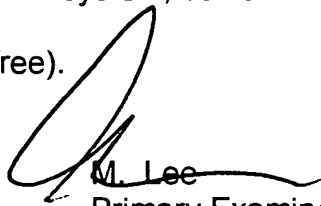

Pauley et al. (6,188,448) shows two tuners and a channel map.

Onomatsu (6,924,848) shows a tuning map.
